Instructions for Using the Peer Chart Review Form - Express Version								
This may be something that you do internally in your office utilizing available staff time to evaluate a handful of charts for the major issues that come up in medicaid audits.								
Randomly select 5 patient visits. Dive into the documentation and figure out if documentation is adequate. The 5 items chosen for the express form were based on common issues in audits, but you may customize it for your own practice based on errors that are made more commonly.								
Debrief with the staff member or dentist who has defaceiencies.								

Peer Chart Rev	riew for Quality Fo	rm - Express Ve	<u>rsion</u>	
Date(s) of Evaluation: Dentist Name:	Reviewer:			
	Keviewer
