

Actions and Algorithms for Medical Emergencies: How to Save a Life (Including Your Own)

A **CRISIS SITUATION** can—and likely will—occur at some time in your practice.

Many potential medical emergencies can be prevented. Gain a comprehensive command of the essential knowledge and skills needed to handle a life threatening medical crisis.

There are more medically compromised patients coming to our offices than ever before. Acquire “up to the minute” actions for dealing with a medical emergency while challenging preconceived or outdated ideas. **Daniel Pompa, DDS** - Oral and Maxillofacial Surgeon, ADA Consultant and Seminar Series Speaker - discusses the prevention, preparation, recognition and management of medical emergencies. Delivered in an interactive, high energy, multi-media presentation frequently described by attendees as “*highly informative*,” “*engaging*,” and “*exceptional*.” A step-by-step *medical* approach using basic physical diagnostic methods is reviewed, giving the attendee a clear understanding of these medical findings.

We will explore the “*Conversational History*” and how it will uncover medical issues not revealed by the standard health history form. Additionally, the participant will learn simple, non-invasive critical tests that can reduce overall risks. We clearly delineate indications for emergency drug use and proper dosages, as well as demonstrate how to assemble and maintain an ideal emergency drug kit. The newest techniques for drug administration will be shown for participants to hone their skills utilizing simulation models and real drugs. Dr. Pompa may incorporate live demonstrations to enhance the learning experience depending on the venue format.

Attendees will receive and review color-coded instructional cards depicting the most common life-threatening situations with algorithms providing an easy to follow action plan for both dentist and team members. We will also review the legal and moral obligations that are presented during a medical crisis.

Learning Objectives:

- Discover three simple chair-side, non-invasive tests to help avoid an emergency
- Recognize the most frequent life threatening emergencies and know when and why they occur
- Review a systematic approach to treat the most common life-threatening scenarios
- Learn how to develop a plan for the office team when dealing with a crisis event
- Determine when to administer the essential “Top 10” emergency drugs
- Understand legal and moral obligations presented by medical emergencies

Emergencies Covered Include:

- ✓ Adrenal Insufficiency
- ✓ Anaphylaxis
- ✓ Angina
- ✓ Asthmatic Attack
- ✓ Cardiac Arrest
- ✓ Hyperglycemia
- ✓ Hyperthyroidism
- ✓ Hyperventilation
- ✓ Hypoglycemia & Insulin Shock
- ✓ Hypothyroidism
- ✓ Mild Allergic Reactions
- ✓ Myocardial Infarction
- ✓ Orthostatic Hypotension
- ✓ Seizures and Epilepsy
- ✓ Stroke (CVA)
- ✓ Syncope

Suggested Formats:

Full or Partial Day; Lecture or
Lecture & Workshop

Suggested Attendee:

For All Health Professionals
and Teams

Meet BOTH Your CE and CPR Requirements!

This course may be combined
as a partial day course when
paired with your **state CPR
Certification course** for a full
day format.
